hot water highly professional cleaner

#### General technical features:

- pump with ceramic pistons • motor and pump connected by elastic coupling and flange • sturdy structure in pressed sheet metal and tubular handle-frame, painted with epoxy powders • wide section wheels for more manoeuvrability • reduced dimensions • reinforced polyethylene gas oil tank into the machine line • 24 volt electric system • 4 pole electric motor (1400Rpm), continuous duty with overload thermal switch
- IDROMATIC vertical boiler with air-cooled combustion chamber, stainless steel burner, highly efficient coil (high diameter and thickness)
- fiberglass reinforced plastic cowling (tip-up for easy maintenance) • regulation valve with the pump set to zero when the spray gun is closed • security valve • highly sensitive thermostat with direct immersion bulb and constant temperature control • detergent aspiration device with metering system • hose, lance with automatic gun as standard professional accessories.
