

ASTRA STEAMER

Professional steam jet machine

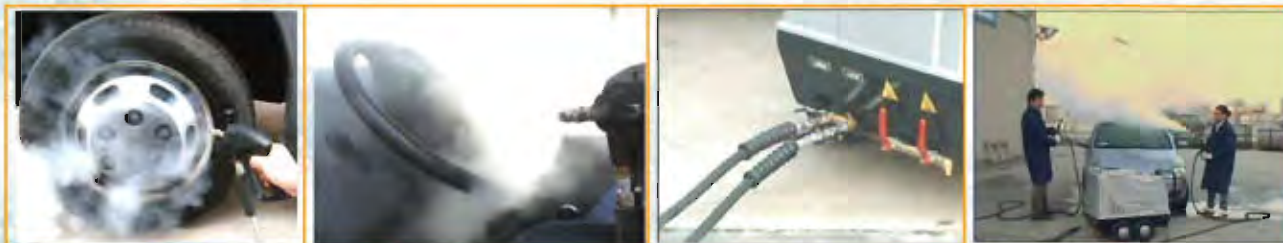

idromatic®

Made in Italy

Astra Steamer

Heating System	: Diesel Fired
Features	: Set for 2 or 4 operators, wet jet option, mobile/fixed
Power:	: 1 Ph. Electric / 110-120 v./220-240 v.
Electric Power	: 350 W
Fuel Type	: Euro Diesel, Biodiesel if requested
Water/Fuel Tank	: 27 / 20 Lt.
Water Consume	: 0,6 LT - 2,5 LT/Per minute (adjustable)
Pre-heating Time	: 1 min water charge+ 2 minute heating
Max Steam Pressure	: 10 bar
Steam Boiler Level	: 200 °C(max.)
Steam Output Level	: 80-90 °C
Size/Weight	: 100cm x 60cm x 85cm W=100 kg
Production Place	: Italy
Safety Devices	: PED Safety Valve, Thermostat, Pressure-switch, Flame detector

Areas of Usage

- * All car washing places and car coiffeurs
- * Chain market car park zones,
- * Site car parks,
- * Shopping centers,
- * Open and closed parking garages.
- * Companies with fleet of vehicles,
- * Gasoline stations.
- * Cleaning of public area and urban weeding

What is the difference between diesel and electrical?

We recommend the diesel model in car wash industry. Electrical model is mainly preferred for cleaning to food production lines. Diesel is more economic and high performance than three-phase electric. Electrical model's pre-heating time is more long according to diesel model (20 min. - electrical / 2 min. - diesel).

What are the benefits of mobile system?

Because it doesn't leave chemical west and give service in application place and when you consider saving of time; you can make arrangements easily in this system with shopping centers, chain market car parks and vehicle fleet owner companies.

Can the steam remove hard mud from the car?

The best result can be taken by cleaning much muddy by steam. As known, water cleans by ripping, steam cleans by brushing of the dirt. In contrast with water, 8 bar pressured wet steam cleans muddy spots in a lump an deeplier.

How to make interior car cleaning?

Astra Steamer has a steam dry-to-wet adjustment. It cleans the mud by wet steam jet and interior with dry jet. all must be done with microfiber cloths.

Are there any other benefits of steamy system as far as another car washing systems?

The sun's UV rays and invisible iron dusts in the air are stick on the paint surface and composes a invisible layer. So this causes to become dull of car paint (for example; brightness of a new car that is bought from agency and brightness of this car after six months aren't sample; this is the reason of enduring at most six months of specially polished surface of the paint.

Cleaning with steam removes the dirt and the car will come as its first day brightness. Furthermore, it provides sterilization of air conditioner and air channels
